Launch Services Proposal for Imperial College Space Team

PROJECT SVAROG

This document is subject to the general terms and conditions of ISISPACE Group

Introduction

This document constitutes the launch services quotation for a 8U CubeSat of Imperial College Space Team end customer, with launch services arranged through SpaceX, in response to the Request for Information received from Ian Poon from Imperial College, which involves the launch of a satellite with the following characteristics:

Parameter	Value	Image
Satellite name:	Project Svarog TBD	 [image for reference only, credit: ISISPACE]
Total Mass:	12 kg	
Size:	8U	
Propulsion:	No	
Launch Opportunity:	SpaceX Transporter 18	

Further to these characteristics, ISISPACE has assumed the following:

- Compatibility of the satellite volume and mass constraints of ISISPACE standard 8U Deployers' Slot. *To be confirmed via virtual fit check, e.g. with a simplified CAD model.*
- The country of satellite registration and operation is assumed to be United Kingdom.

Content of service

ISISPACE offers Customer the following package of baseline launch services for a rideshare payload, which are summarized as follows:

- Negotiation, arrangement and reservation of a launch slot on board of the Launch Vehicle.
- Included in the ISISPACE launch service is a suitable deployer..

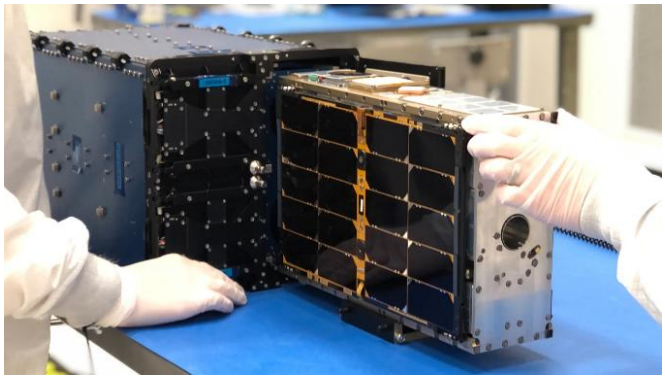

Figure 1: QuadPack Deployer (for reference only).

- Technical and non-technical management of the arrangement of Launch for the satellite in terms of technical compatibility, schedule and planning.
- Representation of the customer towards the Launch Service Provider and vice versa for technical and non-technical questions and meetings.

DISTRIBUTION LIST IN CONFIDENCE

- Arrangement of the necessary technical and interface documentation to be provided to the Launch Service Provider.
- Detailed instructions and procedures for Customer to fulfil its commitments and responsibilities.
- Provision of a loan unit **TESTPOD** suitable to accommodate the satellite for acceptance testing

Figure 2: TestPod for environmental testing

- Regular reports and updates regarding the launch campaign.
- Arrangement and coordination of the pre-launch campaign at the pre-launch integration Facilities in the Netherlands.
- Logistics support for travel to and boarding and lodging near the pre-launch integration facilities in The Netherlands for customer team members (actual travel, boarding and lodging costs to be covered by Customer).
- Technical and logistical support from ISISPACE personnel to the launch team at the pre-launch integration facilities in the Netherlands.
- Shipment of the satellites integrated in its launch deployer from the pre-launch integration facilities in The Netherlands to the launch site, including coordination of any necessary transit or export license for satellite from ISISPACE in the Netherlands to the launch site. Costs for customs clearance or import duties (if exemptions do not apply) are excluded from this offer.
- Integration of the launch deployer containing the satellites onto the launch vehicle.
- Launch of the satellite
- Coordination of information during the Launch day and delivery of post Launch report.

Launch Opportunity

Based on the technical, programmatic, and economic requirements, ISISPACE is pleased to offer the following launch option in line with the requirements defined above:

	Launch Opportunity
Launch vehicle / mission:	Falcon 9 / Transporter-18
Launch site	Vandenberg Space Force Base
Launch period	From October 2026
Typical orbit parameters	510 / 590 km SSO
Accommodation	ISISPACE deployer direct to launch vehicle or on an OTV

Launch Service Price

The Launch Service Price that ISISPACE can offer to launch the 8U Satellite for the abovementioned launch opportunity, based on the information described above, and the conditions, assumptions and milestone payment plan below, is as follows:

	Launch Option
Launch vehicle:	Falcon 9
ROM Price for 8U CubeSat:	**€ 228,500.00** (two-hundred-twenty-eight-thousand-five-hundred Euro)

Payment Milestones

The following typical milestone-based payment terms in percentages of the Price apply to this quote:

Milestone	Description	Percentage
1	Signing of Arrangement of Launch Agreement	40%
2	9 Months prior to the start of the initial launch integration date	20%
3	6 Months prior to the start of the initial launch integration date	20%
4	3 Months prior to the start of the initial launch integration date	10%
5	Completion of launch integration activities	10%

Proposal Conditions and Assumptions:

- Price is in EUR as specified, excluding VAT (not applicable) and other taxes, duties, commissions, bank cost or withholdings.
- Proposal validity: 4 weeks.
- Should the satellite mass turn out to be higher than the defined mass or the deployer qualified mass, an additional launch fee and deployer qualification premium will apply.

Annex A ISISPACE Service Record and Hardware Heritage (March 2025)

Since 2007, ISISPACE completed launch campaigns on various launch vehicles, resulting in **772 satellites** being delivered to orbit using our launch interface hardware for these campaigns. We are specifically proud of our contributions to record launches with Dnepr (2014, 37 payloads), PSLV (2017, 101/104 payloads), Soyuz (2018, 50/72 payloads), Falcon 9 ("Transporter-1" mission 2021, 64/143 payloads), ("Transporter-3" mission 2021, 66/105 payloads), and ("Transporter-12" mission, 49/131 payloads).

ISISPACE Launch Service Heritage – March 2025	
Total combined number of satellites launched:	**772**
Number of ISIPOD deployers launched:	29 (29 doors)
Number of QuadPack deployers launched:	188 (684 doors)
Number of DuoPack deployers launched:	6 (8 doors)
Number of MDS sequencers:	21 (399 commands)
Historical deployer and sequencer success rate:	100 %
Number of 16U CubeSat Satellite deployed:	1
Number of 12U CubeSat Satellite deployed:	1
Number of 8U CubeSat Satellite deployed:	1
Number of 6U/6UXL CubeSat Satellite deployed:	64
Number of 3U/3UXL CubeSat Satellite deployed:	602
Number of 2U CubeSat Satellite deployed:	29
Number of 1U CubeSat Satellite deployed:	58
Number of 0.25U CubeSat Satellite deployed:	13
Number of microsatellites launched:	3
Launch interface hardware heritage:	
Antares	2x ISIPOD
Soyuz	3x ISIPOD, 22x QuadPack, 5x MDS
PSLV	4x SPL, 8x ISIPOD, 54x QuadPack, 3x DuoPack, 10x MDS
Dnepr	9x ISIPOD, 5x QuadPack, 1x MDS
LM-2D	2x ISIPOD, 1x DuoPack
Vega	3x ISIPOD, 7x QuadPack, 2x MDS
LM-11	1x ISIPOD
Falcon 9	95x QuadPack, 2x DuoPack, 3xMDS
Minotaur-C	1x DuoPack
Launcher One	2x QuadPack
Firefly Alpha	1x QuadPack, 1x DuoPack, 1x ISIPOD
